Based on popular demand, Henriques Yachts is introducing an express hardtop model spanning 50 feet in length. This state of the art vessel has been designed for the true sport fisherman in mind including luxury accommodations, strength, space and style. The 50' seaworthy hull is proven to achieve top performance.

The 50' EX HT is engineered to make certain that all passengers are guaranteed a better overall boating experience. This boat has been designed with the fisherman and his crew in mind. Alike all Henriques models, the 50' EX HT offers a sizeable cockpit area in addition to a molded-in transom door, live well, two large refrigerated fish boxes, boarding steps, tackle prep centers, mezzanine seating, and many other luxuries that contribute to the boating experience. The unique helm area is a pod style design offering A/C, heating, L-shaped seating, three helm chairs and plenty of storage cabinets.

The hand-laid fiberglass hardtop is fully enclosed including the entire aft bulkhead—this feature will extend the fishing season as cold and rainy days are no longer an issue on this boat.

The first of its' kind is powered with Twin Caterpillar engines C-18's @1050 HP which has achieved top speed of 37 knots. The engine room is extremely easy to access through the cockpit area and a Seakeeper 9 had been added to this boat to make the ride that more enjoyable!

The interior layout has been crafted to maximize its' total space. In the galley, there is plenty of room for a cook to feel comfortable with a stainless steel drawer-style refrigerator freezer, stove top, microwave, corian countertops, warm wood teak interior and, ample cabinetry with storage space. The salon offers additional L-shaped seating with a nice size teak table, flat screen TV and custom designed décor. Accommodations include a master stateroom with queen bed and a stateroom with upper and lower bunk. All layouts are custom built and designed to accommodate customer needs.

Everyone at Henriques is incredibly proud of their latest and biggest model to join their sportfishing fleet. This well-crafted vessel is truly easy on the eyes and is a beast on the water.

All vessels made by Henriques Yachts, Inc. are manufactured in Bayville, New Jersey. Models range from 28 - 50 feet in sportfisherman, express, express hardtop and express hardtop bridge styles. For more information, please visit our website www.henriquesyachts.com
